

NURSE PRACTITIONER

Internal and External Opportunity Brief

Position: Nurse Practitioner -MOSH
Classification: This is a union position under NEGEU Local 102
Location: North End Community Health Centre Clinic
Hours of Work: Casual
flexibility available
Deadline: May 14, 2023
Hourly rate: \$52.15 – \$60.97, dependent on skills and experience

Job Purpose

Reporting to the Mobile Outreach Street Health (MOSH) Manager, the Nurse Practitioner provides health care service as a member of the collaborative MOSH team that includes physicians, nurse practitioners, nurses, occupational therapists, health case manager and others to a designated client population group requiring focused health and illness care. The nurse practitioner is licensed in a nurse practitioner class pursuant to the regulations of the Nova Scotia College of Nurses. The practice of a nurse practitioner includes the provision of the specialized health services, which include harm reduction, health promotion, illness and injury prevention, coordination and management of acute and emergent health problems and education and advocacy relevant to the patient population. Location of work would include a clinical setting at the North End Community Health Centre (NECHC), and other NECHC and community sites including homes.

The following are the main objectives of the MOSH program:

- To increase access to effective and equitable primary health care to community members across the life span who are homeless, street involved, and insecurely housed.
- To improve health status of marginalized and underserved populations.
- To create a collaborative environment in which information, knowledge, and resources are shared among community service, health care, academic, and government organizations.

Position Responsibilities

1. Health Promotion & Illness Prevention:

Determines the need for and implements health promotion and primary and secondary prevention strategies for individuals, families and groups.

- Collaborates with clients, interdisciplinary teams, and community members in assessing health promotion and illness prevention needs of clients and families.
- Uses a population health, community development approach in planning, developing and implementing health promotion and illness prevention strategies/programs.
- Provides direct, specialized, comprehensive care/nursing services emphasizing relationship-based care, social determinants of health, trauma-informed approach, harm-reduction approach, health promotion, disease prevention and collaborative management strategies to positively affect health outcomes.

2. Management of Health of the Individual and Family:

Assesses, diagnoses, manages and evaluates health/illness concerns of the patients within the context of the patient's experience and determinants of health. Applies accepted theories of family dynamics, interactions and role expectations while managing the care of individuals and families.

- Demonstrates advanced knowledge and synthesis of advanced nursing practice within a clinical specialty.
- Performs advanced health assessment and clinical decision making within a clinical specialty for the purpose of making a diagnosis or assessing the effectiveness of treatment.
- Orders and interprets relevant screening and diagnostic tests.
- Selects, recommends, prescribes and monitors the effectiveness of drugs and interventions.
- Performs procedures (invasive/noninvasive) to restore, regain or maintain physiological stability of client as required by context of practice.
- Initiates referrals and coordinates care with other health care providers and community agencies.
- Provides counselling and education.
- Monitors and documents clients' response to treatment and interventions, health status and outcomes.

3. Advocacy and Community Development:

Utilizes principles of community development and capacity building in promoting and advocating for health policy.

- Uses principles of community development and capacity building in promoting and advocating for healthy public policy.
- Synthesizes information from individuals, client populations and communities to identify broader implications for health within a community.
- Collaborates with interdisciplinary teams and community members in identifying client population, health needs and resources, and in developing, implementing or evaluating community health programs.
- Advocates with or on behalf of clients and other members of the health care team to enhance health care for individuals and the client population in their area of practice.

4. Professional Leadership:

Nurse practitioners, as accountable professionals who practice according to professional, ethical and legal standards:

- Conducts research and applies research and a broad range of theories to clinical practice using critical thinking and decision making relevant to the coordination, delivery and evaluation of health care services in area of practice.
- Provides consultation to nursing staff, managers, coordinators, physicians and other team members regarding clinical and professional practice issues.
- Acts as a mentor to nursing colleagues, students, and others to improve and support nursing practice
- Participates and provides leadership on intra-and inter-disciplinary committees related to development of policies, procedures, protocols, guidelines, standards, education or research
- Anticipates emergent and future issues/changes and provides leadership and vision in short- and long-term planning; contributes to strategic planning at all levels.
- Shares expertise and provides consultation beyond the boundaries of the institution into regional, provincial, national and international communities in areas of specialization
- Collaborates with academic institutions through shared projects and/or through joint appointments
- Contributes to the broader context of nursing knowledge through scientific presentation and

publication
